

Born in the ocean as litter
from bottles and jars & shipwrecks.
Broken, tumbled and smoothed
by waves & tides for years
creating beautiful Ocean Jewels.

*Recycled by the sea,
these beauties are a product of
both nature and man.*

SOFT AQUA

OCEAN JEWELS

EDITION OF 7

Soft aqua was a common color for bottles in the late 1800's and early 1900s.

A common source of this color of glass may come from old Coca Cola bottles which can be found shades of aqua.

Other sources may be old seltzer mineral water bottles, baking soda, fruit jars, and ink bottles. These pieces are most likely from the early 1900's.

HEINEKEN GREEN

OCEAN JEWELS

EDITION OF 7

These green ocean jewels come mainly from lemon-lime flavored sodas such as 7-UP, Sprite, Mountain Dew, red wine and beer bottles such as Heineken.

It has a wide range of shades and hues.

Heineken bottles, Rolling Rock and lots of red wines come in green bottles still today.

WHISKEY & BEER

OCEAN JEWELS

EDITION OF 7

Brown sea glass may come mainly from beer, root beer and whiskey bottles.

The older the glass the less common it is. Old Clorox and Lysol products came in large brown bottles.

Today, many wine and beer companies still use brown bottles to help protect the liquor inside the bottles from the sun.

GREAT WHITE OCEAN JEWELS

EDITION OF 7

Most clear sea jewels come from items such as soda bottles, glass food containers, liquor bottles, white wine bottles, jars as well as old milk and medicine bottles.

It looks frosty and white when dry.
